World Wide Fiberglass Systems
1809 27th St.
Bay City, MI 48708
Mr. Steve Schnettler

Dear Steve

I have both reviewed and used your product "Fiberglass Repair Estimator" and find it to be one of the most revolutionary on the market today tailored for preparing constantly accurate fiberglass damage estimates to maritime recreational vehicles. Your program and concept allows for a reliable and consistent method to evaluate obvious and visible damage repair costs and as such allows more accurate claims evaluation.

As an Adjunct Professor with the Department of Continuing Education at SUNY Maritime I will be incorporating the use of this program in my damage survey class to aid my students in evaluation of claims and damage to vessels, and thank you for granting permission to do so.

Thank you again for providing such a quality program to the profession and allowing me to incorporate it in our education programs.

Janet M Peck

Janet M Peck, *CMS, AMS, AIMS*

Adjunct Professor
